

Cisco OnPlus Family of Cloud-Based Network Management Services

SIMPLE AND AFFORDABLE SOLUTIONS TO REMOTELY MONITOR, MANAGE, AND MAINTAIN SMALL TO MEDIUM-SIZED NETWORKS

The Cisco OnPlus™ family of network management services offers cloud-based solutions to simplify the monitoring, management, and maintenance of networks with 1,000 users or less for Cisco partners and IT administrators.

For Cisco partners and IT administrators tasked with assessing the overall reliability and serviceability of their networking devices, **Cisco OnPlus Scanner** provides a fast and easy method for automating the inventory and lifecycle management processes. The browser-based solution, available at no cost, provides quick visibility into the network infrastructure with the essential information to assess and ensure dependability. Learn more about OnPlus Scanner: www.cisco.com/go/onplus. Start using OnPlus Scanner today: www.cisco-onplus.com.

For Cisco partners and IT administrators that want to improve their productivity and responsiveness when installing, configuring, monitoring, or troubleshooting network devices, the **Cisco OnPlus ON100 Network Agent** represents a comprehensive yet simple and affordable solution. The appliance-based agent discovers any device on the network with an IP address and enables real-time monitoring and remote management of networking devices for fast and efficient response to notifications and programmable alerts. Learn more about the OnPlus ON100 Network Agent: www.cisco.com/go/onplus.

Cisco OnPlus Cloud-Based Network Management Solution Comparison

| | | OnPlus Scanner | OnPlus ON100 |
|-------------------|---|--------------------|----------------------|
| Monitor | Discovery and reporting frequency | On demand | Continuous |
| | Visibility | Supported devices* | Networkwide |
| | Programmable alerts | | ✓ |
| | Network performance | | ✓ |
| Manage | Network device inventory | ✓ | ✓ |
| | Network topology | ✓ | ✓ |
| | Remote connectivity to network devices | | ✓ |
| | Network device configuration | | ✓ |
| | Performance reporting | | ✓ |
| Maintain | Device warranty status | ✓ | ✓ |
| | Device lifecycle status | ✓ | ✓ |
| | Cisco® service contract verification | ✓ | ✓ |
| | Replacement/upgrade recommendations | ✓ | ✓ |
| | Device notifications/bulletins | ✓ | ✓ |
| | Remote Cisco IOS® Software/firmware uploading | | ✓ |
| | Cloud backup/restore of device configuration | | ✓ |
| Deployment | Pricing model | Free | Subscription service |
| | Service delivery model | Browser | OnPlus appliance |
| | OnPlus Cloud Portal interface | ✓ | ✓ |
| | Mobile app interface | ✓ | ✓ |

* Now available in beta release, OnPlus Scanner can discover networking devices that run Cisco IOS. Future updates will expand the discovery capabilities to identify additional Cisco and non-Cisco devices.

Cisco OnPlus Family of Cloud-Based Network Management Services

SIMPLE AND AFFORDABLE SOLUTIONS TO REMOTELY MONITOR, MANAGE, AND MAINTAIN SMALL TO MEDIUM-SIZED NETWORKS

Benefits for Cisco Partners

Cisco OnPlus solutions offer several benefits to partners:

- Enable the quick identification of product replacement and upgrade opportunities through the no-cost OnPlus Scanner
- Improve responsiveness and productivity in delivering managed network services through the simple and affordable OnPlus ON100 Network Agent
- Accelerate and elevate the accuracy of network assessments through the automated discovery of networked devices
- Enable growth in recurring revenue from managed services while protecting profits through increased efficiency
- Streamline managed services operations while providing in-depth monitoring and management by integrating with leading professional service automation and remote monitoring and management tools
- Cloud-based solutions ensure visibility from anywhere without the need to buy and maintain dedicated systems
- Add-on applications enable and enhance high-value services such as wireless network management, performance monitoring and optimization, WAN monitoring and fault isolation, and managed security services—all with the ease and affordability of a cloud-based service

Benefits for IT and Network Administrators

Cisco OnPlus solutions offer several benefits to IT and network administrators:

- Enable the quick identification and prioritization of product replacement and upgrade needs through the free OnPlus Scanner
- Improve responsiveness and productivity in managing and maintaining networks through the simple and affordable OnPlus ON100 Network Agent
- Accelerate and elevate the accuracy of network assessments through the automated discovery of network devices
- Streamline IT management operations while providing in depth monitoring and management by integrating with leading Remote Monitoring and Management tools
- Cloud-based solutions ensure visibility from anywhere without the need to buy and maintain dedicated systems
- Add on applications enable and enhance advanced capabilities such as wireless network management, performance monitoring and optimization, WAN monitoring and fault isolation, and network security management—all with the ease and affordability of a cloud-based service
